## **Stommel Haus Debut at Eco Build**

### **Stommel Haus presents new generation timber houses and latest timber wall construction at Eco Build in London in March 2011**

Stommel Haus, German Premium Manufacturer of high quality, energy efficient timber houses is set to debut their high quality timber houses at Eco Build, London from the 1<sup>st</sup> to 3<sup>rd</sup> March 2011.

Neunkirchen, Germany, November 2010

With sustainable living a hot topical issue of the 21st Century, Stommel Haus a German Premium Manufacturer of high quality, energy efficient timber houses is set to debut their high quality, energy efficient and healthy timber houses at Eco Build in London in March 2011.

Barbara Fischer-Clark, Managing Director of Clark & Fischer-Clark, Stommel Haus UK Agency says: "The British public are becoming more and more ecologically aware . Developers and home builders in the UK are busy implementing the requirements to build energy efficient and sustainable homes. Even the very latest requirements in energy efficiency and air tightness are outperformed by Stommel Haus homes while at the same time making sure that the homes have a healthy indoor climate based on using wood from certified forests and natural and sustainable materials only. "

In response to the demand for more eco friendly building, Stommel Haus, manufacturers of houses for more than 40 years, are bringing their beautiful and revolutionary Healthy homes, to Eco Build.

When it comes to ecologically friendly, energy efficient and healthy living, Germany is well advanced. Stommel Haus reflects this advanced living standard in the design of their houses by achieving very high insulation values and by using modern and eco-friendly heating systems. The healthy indoor climate is based on the construction of the houses with a diffusion permeable timber wall construction devoid of any toxic substances.

Nestled in the small town of Neunkirchen-Seelscheid near Cologne, Stommel Haus develops and produces their certified timber houses with high precision CNC machines. The houses are transported on site where they are erected by qualified teams and made wind and water tight typically within 5-7

days. The interior is then fitted by German craftsmen with only the best branded interior products.

Barbara Fischer-Clark states "We believe that the designs of our houses both in terms of aesthetics and technology in combination with German quality, punctuality and fixed prices should please British consumers and developers alike. The participation at Eco Build in London in March 2011 is an important step for us to further promote the Stommel Haus brand, aiming to provide developers and British people with sustainable, very energy efficient and contemporary houses of very high quality.

Stommel Haus will unveil their latest wall construction design at the stand Timber Works TW15 in the South Hall at Eco Build in London, Excel from the 1<sup>st</sup> until 3<sup>rd</sup> March 2011.

### **About Stommel Haus**

Stommel Haus GmbH is a premium manufacturer of energy efficient, solid timber houses. With 40 years of experience, the family business has proven that building with solid timber, energy efficiency, contemporary design and the attention to quality are no contradiction but lead to providing a modern, ecological and high quality product.

Ein Haus wie ein Baum.

Nestled in the small town of Neunkirchen-Seelscheid near Cologne, Stommel Haus develops and produces their certified timber houses with high precision CNC machines. The houses are transported on site where they are erected by qualified teams and made wind and water tight typically within 5-7 days. The under-floor heating, heat pumps and the interior are then fitted by German craftsmen with only high quality branded products.

Since their foundation 75 years ago, the Stommel family embraced this wonderful material, building timber houses for 40 years with an emphasis on ecological and energy efficient building not only enforced by German building regulations but by the enthusiasm for the natural and healthy material wood used for the benefit of the wellbeing of home owners.
