**Charity Run at Stommel Haus
for the benefit of Asklepios Children's Hospital**

Stommel Haus, German Premium Manufacturer of high quality, energy efficient timber houses organised a charity run for the benefit of the Asklepios Children's Hospital in Sankt Augustin, Germany in celebration of their own 75th Anniversary.

Neunkirchen, Germany, October 2010

Nestled in the small town of Neunkirchen-Seelscheid near Cologne in Germany you can find one of the leading manufacturers of high quality pre-fabricated contemporary timber homes.

The company organised a charity run at the occasion of the 75th anniversary of the company. Around 100 participants enjoyed not only their favourite sports but also the perfect organisation and support by the Stommel Haus staff. The proceeds of the day and the collection of the parent's initiative for children who suffer from cancer go to the Asklepios Hospital in Sankt Augustin where the money will be used to extend the "children's paradise". The chairman Ruth Wehnert was surprised and happy to receive a cheque of 4,000 Euro from Waltraud, Franz and Ralf Stommel. Children allowed to leave the ward of the Asklepios Hospital temporarily will be able to have a distraction from their difficult everyday life in hospital, enjoy some activities and have fun in the "children's paradise". "The weather was great, the participants enjoyed the day and they intend to come back next year", says Franz Stommel.

About Stommel Haus

Stommel Haus GmbH is a premium manufacturer of energy efficient, solid timber houses. With 40 years of experience, the family business has proven that building with solid timber, energy efficiency, contemporary design and the attention to quality are no contradiction but lead to providing a modern, ecological and high quality product.

Stommel Haus develops and produces their certified timber houses with high precision CNC machines. The houses are transported on site where they are erected by qualified teams and made wind and water tight typically within 5-7 days. The under-floor heating, heat pumps and the interior are then fitted by German craftsmen with only high quality branded products.

Since their foundation 75 years ago, the Stommel family embraced this wonderful material, building timber houses for 40 years with an emphasis on ecological and energy efficient building not only enforced by German building regulations but by the enthusiasm for the natural and healthy material wood used for the benefit of the wellbeing of home owners.
